Comprehensive Plan Update Scoping

With the launch of the update of the Bellevue Comprehensive Plan project, the city's boards and commissions will play a vital role. At this forum board and commission members will be asked to provide their thoughts on what issues should be the focus of the update, to help guide and shape the plan, and to ensure that the plan continues to embrace the community's [vision](#).

This update is a major, ten-year review of the community's plan for the next twenty years. Now is the time to think and plan for the future generations of Bellevue.

The forum is the first step in examining how the city has changed over the last ten years. These changes include capturing new population and job growth, and continuing a strong policy foundation to meet rising community, environment, economy, and family needs. The update will also continue to reinforce the plan as the foundation for city decisions and actions especially related to infrastructure investments, neighborhoods, land use, environment, and economic development.
